Summary

Undergraduate Computer Science student at Kwara State University, actively developing and applying skills in **Backend Engineering**. Proficient in the Node.js ecosystem (JavaScript/TypeScript, Express, MongoDB) and Python, with a strong focus on building secure, high-performance RESTful APIs. Interested in staying abreast of new technology developments and an avid chess player (1600+ ELO).

Education

Computer Science, B.Sc. (Undergraduate)
Kwara State University, Malete

Expected Graduation: 2030

Technical Skills

Languages/Runtime: JavaScript (ES6+), Python, TypeScript (Beginner), HTML, CSS, SQL
Frameworks/Libraries: Node.js, Express.js, Axios, Mongoose, Minimist, Tailwind CSS (for personal projects, if applicable)
Databases/ORMs: MongoDB, SQLite, Prisma ORM
Tools/DevOps: Git, GitHub, Neovim, JWT, Bcryptjs, OpenWeatherMap API, TMDB API

Selected Projects

- **CBT Platform API** (In Progress)
 - ▶ Developing a secure, high-performance REST API for a Computer-Based Test (CBT) platform using Node.js/Express.
 - ▶ Handles dynamic test generation, accurate scoring, and tracked practice sessions.
 - ▶ Node.js, Express.js, MongoDB, Mongoose, JWT, Bcryptjs
- **CS-NOTE**
 - ▶ Centralized static web resource for 100-level Computer Science students with structured outlines and formula cheat sheets.
 - ▶ Features a dynamic quiz system powered by Gemini Pro for interactive learning.
 - ▶ HTML, CSS, JavaScript (Vanilla), JSON, Gemini Pro
- **Rumi: Personal Blogging API**
 - ▶ RESTful API for a personal blogging platform, demonstrating robust backend architecture.
 - ▶ Utilizes an ORM to manage data persistence and interaction with a SQLite database.
 - ▶ Node.js, Express, Prisma (ORM), SQLite
- **SummerWinter Weather API**
 - ▶ Robust weather API fetching real-time data from OpenWeatherMap for any requested city.

- ▶ Implemented Redis caching to significantly improve performance and minimize external API calls.
- ▶ Node.js, Express, Redis, OpenWeatherMap API
- **Horizon / PayPal Expense Tracker**
 - ▶ Developed two separate RESTful APIs for user management (Horizon) and personal finance tracking (PayPal).
 - ▶ Both include full CRUD operations and secure user authentication.
 - ▶ Node.js, Express, MongoDB, Mongoose
- **CLI Tools (GitHub User / Movie)**
 - ▶ Developed command-line interfaces to fetch and display GitHub user activity and TMDB movie listings.
 - ▶ Practical experience with third-party APIs and handling CLI arguments.
 - ▶ Node.js, GitHub API, TMDB API, Minimist, Axios

Experience

Computer Teacher

Imbashi

2024 – 2025

Ilorin, Kwara State

- Designed and implemented standards-aligned lesson plans to foster practical computer literacy.
- Incorporated technology and effective classroom management to create a positive learning environment.
- Provided hands-on opportunities for students to build and demonstrate essential computer skills.
